DESTINATIONS BROCHURE YEAR 13 *2023/2024*

STUDENTS ON PATHWAY TO SUCCESS

I am thrilled with another year of outstanding student destinations, with approximately 65% of students progressing to university and 35% moving on to apprenticeships or other opportunities. The academy's emphasis on practical learning in science and engineering, along with extensive employer-led projects, has played a key role in the success of this cohort in securing their next steps.

Every year, our students achieve impressive destinations, and this year is no exception. From the start of their course, we focus on future pathways, ensuring that all students are motivated not only to succeed academically but also to build the right experiences needed for their applications in Year 12 and Year 13. Some students make their decisions about their next steps at the last moment, and we continue to support them throughout, whether they choose university or apprenticeships.

It is truly a pleasure to witness the success of each individual student.

Ms. K. Donovan
Principal

RECENT APPRENTICESHIP DESTINATIONS

RECENT UNIVERSITY DESTINATIONS

RECENT UNIVERSITY AND APPRENTICESHIP COURSES

Accounting and Finance

Aerospace Engineering

Architecture

Artificial Intelligence & Robotics

Biomedical Science

Civil Engineering

Computer Science

Computer Science & Business

Electrical Engineering

Extended Engineering

Finance, Accounting Investment

Management

Maths and Biochemistry

Mechanical Engineering

Mechatronics

Motor Sports Engineering

Pharmaceutical sciences

Physical Science

Physics

Psychology

Quantity Surveying

Robotics Engineering

WHERE ARE THEY NOW?

Hans Tshimanga
Higher Education
*Extended Engineering
at Brunel University*

Ayesha Naseer
Apprenticeship
*Diploma in Early Years
at Little Green Man*

Yasin Bin Aswat
Higher Education
*Computer Science
at University of Kent*

Jensen Hayes
Internship
*Management training at
Childrens Society, Upminster*

WHERE ARE THEY NOW?

Tania Pataca Gomes
Higher Education
Biomedical Science
at Westminster University

Jasper Middleton
Higher Education
Computer Science & Business
at North-Eastern University

Mohammad Rahman
Degree Apprenticeship
Level 6 Engineering
at NTT

Leo Zhang
Higher Education
Accounting and Finance
at Greenwich University

WHERE ARE THEY NOW?

Amar Rana Singh

Apprenticeship
*Level 6 Civil Engineering
at TfL*

Seana Ogbeide

Higher Education
*Architecture
at Oxford Brookes*

Liam Kirby

Apprenticeship
*Level 4 Quality Surveying
at RW Armstrong*

Philip Aduroja

Higher Education
*Electrical Engineering
at Loughborough University*

APPLYING FOR UNIVERSITY HIGHER EDUCATION WEEK

Every year, students take a break from their regular timetable for a week in July to participate in Destinations Week – University. During this week, leading universities present on key topics such as applying to university, choosing courses, deciding between city and campus universities, and understanding university finance.

Students also take part in university workshops supported by key school staff, where they learn how to navigate the UCAS website and complete the UCAS application form. There are focused sessions on writing personal statements, and throughout the first term of Year 13, students have weekly timetabled lessons to support them in completing their university applications on time and ensuring that their references are of the highest quality.

We encourage students to be both aspirational and realistic in their university choices. This supportive approach has led to all Year 13 students at Brook Sixth Form & Academy securing places at excellent universities, with students pursuing impressive degrees ranging from Aerospace Engineering to Biomedical Sciences.

APPLYING FOR APPRENTICESHIPS

At Brook Sixth Form and Academy, we emphasize the importance of exploring all post-16 pathways from the start of a student's journey. Within the first six weeks, we host our first apprenticeship talk, delivered by industry employers. While many students aspire to follow the traditional route to university, we ensure that every student is equally informed about all options available to them.

Most presentations are held in person, although some employers opt to present remotely. Employers provide valuable insights into what apprenticeships involve and share tips on creating a strong apprenticeship application. Additionally, many employers bring current apprentices to speak with students, offering firsthand experiences from young people who are similar in age and background. This allows students to connect with relatable role models and make well-informed decisions about their future.

SIXTH FORM OPEN EVENING AND FUTURE DESTINATIONS EVENT

Every November, Brook Sixth Form & Academy hosts a unique Sixth Form Open Evening. Current students have the opportunity to meet university representatives alongside local and national employers, each hosting stands to provide valuable information about their institutions and career opportunities. Future students are also invited to explore Sixth Form course options and discover the diverse opportunities available to them upon completing their studies at Brook Sixth Form & Academy. This distinctive event is always popular, drawing hundreds of young people each year who are eager to learn more about their future paths.

Our Sixth Form students at Brook Sixth Form & Academy have achieved great results. They are progressing confidently to the next stage of their lives, with impressive and well-secured destinations awaiting them.
